

N.U.in Program Academic Handbook: QUB Northern Ireland

In this handbook, you will learn about important academic policies at your host institution for the fall. The handbook also includes advice for transitioning from high school to college that the Global Experience Office’s Academic Integration & Planning team has put together based on past N.U.in students’ experiences. By breaking out of the ordinary and choosing the N.U.in program, you have set yourself up for a uniquely rewarding and challenging first semester! This guide will help you prepare for the academic adjustments and opportunities you will experience this fall.

Contact Information31

Welcome to Students and Families!

We are excited to be part of your academic journey this fall! We have prepared this guide to help you navigate through academic expectations and policies at Queen's University Belfast, as well as to help make sure you are preparing for the academic transition to Northeastern in the spring.

In addition, we have included a set of [optional summer exercises](#) to help you best prepare for your academic experience this fall.

Studying abroad or domestically in your first semester of college is a unique and highly beneficial experience. To get the most out of it, you should carefully prepare for the details of your site location academics. Please be sure to attend your **Northern Ireland Webinar this summer** and refer to this guide often to find information on academic policies and expectations.

We hope you have a wonderful experience this fall.

Sincerely,

Dr. Bryan McAllister-Grande
Director, Academic Integration and Planning Team
Global Experience Office

Academic Success – Top 10 Tips

1. Stay in frequent communication with your academic advising team for your College. They can help you navigate challenges, connect with mentors/tutors, and transition to Boston in the spring. Most academic advising teams will be visiting your location in the fall!
2. Do some summer prep work before you go (like reading this handbook!). We've included a few exercises and resources in this guide, but we also recommend exploring your host institution's website. Take some time to review the academic norms, courses, course delivery, and policies in your location.
3. Connect with your Student Success Guide (SSG) on MentorHub. Your guide can help you find resources you need at Northeastern.
4. You may encounter some harder challenges academically than you are used to. This may be because you are navigating a new culture and your first semester of college! Try to reflect and identify what the root causes might be. Is it because you might be homesick or experiencing some cultural adaptation challenges? We've prepared some exercises to help you reflect on some causes and how you can find support.
5. Seek out your professors during their office hours. Try to reach out to them even if you don't have a direct question: they are often happy to chat with you about your interests and life in the city/culture!
6. Use Northeastern's Virtual Peer Tutoring Service!
7. Use a planner or Time Management app such as Trello or Evernote to manage your time effectively and make sure you are meeting deadlines. We recommend entering all deadlines for major exams and assignments in your planner or app as soon as you receive your syllabi in the first week of classes so you know what to expect for the pace of your semester!
8. Form study groups within your N.U.in families or with classmates. Don't be afraid to invite students from your host institution or other schools who are also in your classes—studying together is an easy way to get to know them!
9. Walk to your host institution's library and find a good, quiet study space. Use this space when you really need to focus on a big test, assignment, or organizing your time in your planner or time management app.
10. Check your email at least once a day to stay up to date with communications from Northeastern, your host institution, and your professors.

Courses and Curriculum

Your curriculum is prepared for your College and major. Please refer to the [curriculum](#) on the N.U.in website and your academic advising team to discuss your specific requirements and course plan.

NUpath requirements refer to Northeastern's core curriculum. More information is available [here](#).

Culture Course

All students take one Culture course on the N.U.in program. This place-based course is a signature feature of Northeastern's global experiential learning model. It is typically an immersive introduction to your city or location. All N.U.in Northern Ireland students will take the following Culture course in Fall 2023:

Belfast: City, Culture, Society

This is a compulsory module for all Northeastern University students on the NU.in programme at Queen's. It will ground students in the city, cultures, histories and representations of Belfast. Across six separate events or field trips, three of which will relate to the history and politics of the city and three to the arts and culture of Belfast, students will engage with a vibrant and diverse range of aspects of the city in which they will be studying.

NU Course Equivalent: CLTR 1990, Culture Elective (Belfast: City, Culture, Society).

Global Learning Experience Course (1 credit, online)

This is an optional 1-credit course for students interested in the subject of global learning and citizenship. It is intended to complement your abroad experience as well as to encourage reflection and immersion.

This seminar will focus on global citizenship and cultural difference in the twenty-first century. We will begin by defining global citizenship and examining its origins and critiques. We will then explore frameworks of intercultural learning and praxis. You will critically analyze and apply these ideas as you engage in personal reflection and team-based problem-solving, connecting issues you encounter during your own global experience in your N.U.in host site with broader dynamics of globalization, migration, positionality, power, and privilege.

NU Course: GBST 1012, The Global Learning Experience.

Courses and Course Descriptions

All courses listed are subject to change.

A range of courses (modules) have been specifically designed for NUin students by Queen's. These are:

Degrees of Writing

Designed for students to study and practice writing in a workshop setting. Students read a range of texts in order to describe and evaluate the choices writers make and apply that knowledge to their own writing and explore how writing functions in a range of academic, professional, and public contexts. Offers students an opportunity to learn how to conduct research using primary and secondary sources;

how to write for various purposes and audiences in multiple genres and media; and how to give and receive feedback, to revise their work, and to reflect on their growth as writers.

NU Course Equivalent: ENGW 1111, First Year Writing. NUpath: WF.

NOTE: To complete the Writing in the First Year NU Core/NUpath 1st Yr Writing requirement, you must earn a C minimum equivalent grade in this course.

Calculus for Scientists & Engineers

Covers definition, calculation, and major uses of the derivative, as well as an introduction to integration. Topics include limits; the derivative as a limit; rules for differentiation; and formulas for the derivatives of algebraic, trigonometric, and exponential/logarithmic functions. Also discusses applications of derivatives to motion, density, optimization, linear approximations, and related rates. Topics on integration include the definition of the integral as a limit of sums, antidifferentiation, the fundamental theorem of calculus, and integration by substitution.

NU Course Equivalent: MATH 1341, Calculus 1 for Science and Engineering. NUpath: FQ.

Foundations in Psychology

Surveys the fundamental principles, concepts, and issues in the major areas of basic and applied psychological science. Approaches the study of psychology as a method of inquiry as well as a body of knowledge. Introduces students to research methods and to psychological research on the biological bases of behavior, learning, sensation and perception, cognition and language, development, emotion, social psychology, personality, and psychological disorders.

NU Course Equivalent: PSYC 1101, Foundations of Psychology. NUpath: ND, SI.

The Processes of Life

The Processes of Life covers biochemistry, molecular biology and genetics in the context of life on earth. The course begins with an introduction to the molecular and biochemical processes that underpin life on earth. Students are then introduced to basic cell structure and communication, transport, the cell cycle, classical and cancer genetics and selected human genetic disorders. Students receive practical teaching in key laboratory skills and mathematical problem solving, DNA extraction, amino acid titration and enzyme kinetics. Students will also receive teaching in laboratory Health and Safety regulations and will be instructed in Good Laboratory Practice.

NU Course Equivalent: BIOL 1111/1112, General Biology 1 with Lab. NUpath: ND, AD.

Foundation Physics with Lab

Covers calculus-based physics. Offers the first semester of a two-semester integrated lecture and laboratory sequence intended primarily for engineering students. Covers Newtonian mechanics and fluids. Stresses the balance between understanding the basic concepts and solving specific problems. Includes topics such as one-dimensional and three-dimensional motion, Newton's laws, dynamics friction, drag, work, energy and power, momentum and collisions, rotational dynamics, forces, torque and static equilibrium, pressure, fluids, and gravity.

NU Course Equivalent: PHYS 1151/1152/1153, Physics for Engineering with Lab and ILS. NUpath: ND, AD.

General Chemistry and Laboratory Skills

Introduces the principles of chemistry, focusing on the atomic and ionic nature of matter and its interactions and reactions that form the basis for the underlying molecular dynamics of living systems. Presents basic concepts of chemical bonding and intermolecular interactions of molecules and atoms. Introduces kinetics and chemical thermodynamics underpinning physical and chemical properties. Offers an opportunity to learn skills in separating, purifying and measuring physical properties of chemical compounds.

NU Course Equivalent: CHEM 1161/1162/1163, General Chemistry for Science Majors with Lab. NUpath: ND.

Additionally, a range of mainstream QUB courses (modules) have been approved by Northeastern University for NUin students. These are:

A World on the Move: Historical and Anthropological Approaches to Globalization

This module provides an introduction to the study of globalization and human mobility from historical and anthropological perspectives. The key themes covered include the history of globalization; economic and political globalization; cultural convergence and the expression of cultural difference; technology and human mobility; and migration, diasporas, and tourism. We shall examine these themes by drawing on a range of historical and anthropological case studies.

NU Course Equivalent: ANTH 2305, Global Markets and Local Cultures. NUpath: IC.

Being Human: Evolution, Culture, and Society

This course is designed to introduce students of different disciplinary backgrounds (anthropology, sociology, history, politics, geography, philosophy, languages, etc.) to anthropology. What can an anthropological perspective add to other disciplinary perspectives on culture and society? We will address this issue through a discussion of a number of questions that are key themes in the discipline. How do people create social relationships within and between families, and what does this tell us about wider societal processes? What are the principles which underlie identity formation in different societies and cultural settings – how can we explore this through the lens of gender, ethnicity, national identity and class? And last but not least, how do anthropologists approach the theme of human evolution?

NU Course Equivalent: ANTH 1101, Peoples and Cultures. NUpath: IC.

Comparative Politics

This module will introduce the most important themes and perspectives in the comparative approach to politics. A wide variety of case studies from around the world will be used to illustrate aspects of politics and political institutions. Beginning with a discussion of the key concepts and terminology of comparative politics, the module moves on to focus on fundamental concepts such as the state and the nation before going on to look at structures and institutions (such as legislatures and executives), actors and processes (such as political parties, political representation and voting behaviour), and outcomes and prospects (such as public policy outcomes and prospects for democratic reform). The module concludes with a summary of the themes encountered on the module, including a critical reflection of studying politics through comparative research methods.

NU Course Equivalent: POLS 1155, Comparative Politics.

Economy, Society, and Public Policy 1

The module will cover the foundations of modern Microeconomics. Microeconomics is the study of how individual households and firms make decisions and how they interact in specific markets. Social interactions and incomplete information will be an integral part of this course. After studying various theoretical models and their empirical relevance, the course will discuss public policies designed to influence economic outcomes.

NU Course Equivalent: ECON 1116, Principles of Microeconomics. NUpath: AD, SI.

Global Business Environment

This module on global business environment is concerned with the strategic perspective of the external contextual factors in a multinational corporation (MNC) setting. The module seeks to introduce students to an external environment of international business (IB) that is multi-layered and multi-dimensional. Central to the objective of this module is the enablement of learners to holistically explore global, economic, institutional, technological, socio-cultural and ecological contexts in order to derive competitive implications as well as mitigating actions.

NU Course Equivalent: INTB 1203, International Business and Global Social Responsibility. NUpath: ER, IC.

Introduction to English Language

This module offers a broad introduction to key topics in English language and lays the foundations for the systematic study of language in all its diversity. The module content will be explored by looking at how the English language varies in context by looking at both standard English as well as local varieties of English. Among the topics covered are: established opinions on which varieties (accents and dialects) of language are considered to be “good” and which are considered to be “bad”; language sounds (phonetics), language structure (syntax and morphology); older versions of English (diachrony); and how language works in cultural contexts and intersects with issues of power and gender. In summary, the module encourages and enables students to think about language analytically and to develop an appreciation of the scientific study of language appropriate for university level and for further study in linguistics.

NU Course Equivalent: LING 1449, English Now and Then. NUpath: IC.

Introduction to Practical Theater

This practice-as-research module provides an introduction to theatre practice from the perspective of the creative performer. It aims to develop students’ potential to become imaginative and reflective theatre practitioners.

NU Course Equivalent: THTR 1130, Introduction to Acting. NUpath: EI, IC.

Introduction to Theater

This module will introduce students to a wide range of different theatre forms, traditions and practices, all of which will be explored through the lens of performance - as opposed to a literary study of dramatic texts - so that students can critically engage with all the complexities of the material stage (actors, audiences, architecture, mise-en-scène, movement, etc.)

NU Course Equivalent: THTR 1101, Introduction to Theatre. NUpath: EI, IC.

Philosophy and Human Nature

This course is an introduction to some fundamental philosophical problems that come up when we think about human nature. It's also an introduction to the methods which philosophers use for solving them, including some techniques of sound reasoning and argument.

NU Course Equivalent: PHIL 1101, Introduction to Philosophy. NUpath: ER, SI.

Perspectives on Politics

This module examines key issues and debates defining contemporary political theory. It does this by focusing on three overarching and interrelated themes: democracy; the relation between the individual and society; and the basis of the state and state politics. In the first section of the course (Section A, Democracy), students are introduced to competing conceptions of democratic rule, to the pressing problem of majorities and minorities in democratic politics, and to the question of the economic and social pre-conditions of a vibrant democratic culture. In the second section (Section B, The Relation between the Individual and Society), students move on to explore the relation between the individual and society in contemporary politics. Here the focus is the contested meanings of political freedom, justice, and citizenship and the ideologies underlying these contested meanings, in particular liberalism, socialism, republicanism and communitarianism. Building on the material discussed in sections A and B, the third section of the course (Section C, The State: Legitimacy, Power and War) then considers the questions of state legitimacy, the nature of power, and the right of states to resort to war. Students are introduced to traditional liberal justifications of legitimate state authority and the criticisms of these by anarchist and other radical writers; to various understandings of political power and to feminist critiques of these understandings; and, finally, to 'just war theory', which defends the state's right to wage war, and its long-standing rival, the doctrine of 'anti-war pacifism'. Throughout the course the practical implications of different theoretical perspectives are stressed, illustrating to students the impact of theoretical considerations on their everyday lives.

NU Course Equivalent: POLS 2332, Contemporary Political Thought.

Rethinking Society

The module offers a general introduction to the discipline of sociology for those with no experience of studying sociology before. Its primary objective is to initiate students to sociological thinking. Sociology does not rely on our subjective experience and general ideas commonly shared within the society (beliefs, customs, traditions, values, norms); its critical way of thinking and its methods allow us to discover aspects of social life that most people are unaware of. This will be done through a diversity of topics such as social class, suicide, race, gender, disability, globalisation, violence and other social phenomena. The module will provide a background for those intending to study sociology in the second and third years, but also acts as a stand-alone sociology course for those who do not intend to study it further.

NU Course Equivalent: SOCL 1101, Introduction to Sociology. NUpath: DD, SI.

Textbooks

Students are not required to buy textbooks; copies of all course texts used are available in QUB's library. If you need a calculator, double check the specifications with your course instructor so you select the correct model.

Libraries and Research

There are four libraries at QUB: the McClay Library, Medical Library, Biomedical Library and Special Collections and Archives, as well as an e-Library. The main library used by the student body is the award-winning library 'Mc Clay Library.' Opened in 2009, this library is home to over 2,000 reader seats. The McClay houses 1.2 million volumes. Facilities include IT training rooms, a Language Centre, support areas and a cafe, as well as the University's Special Collections, subject-related inquiry points and a vast range of printed works. Opening hours vary across the year but during term-time, the library will usually be open 24 hours per day and staffed with librarians from 9 a.m. until 8 p.m. More info available here: [The McClay Library | About | Queen's University Belfast \(qub.ac.uk\)](#)

N.U.in students also have access to the electronic resources provided by Northeastern, via the NU Libraries website [here](#). For help with research, please view the [subject guides](#) created by Northeastern librarians. If you have a question for the librarians, you can [contact them](#) through live chat or a web form.

Add/Drop

After arriving on site, students in the N.U.in Northern Ireland program will meet with on-site advisors. At these meetings, you will have the opportunity to make needed add/drop adjustments. After these meetings, you can no longer make course changes.

Students are discouraged from adding or dropping courses once they arrive on site because NU academic advising has already carefully reviewed, discussed, and confirmed fall classes. Any changes that students make to their course registration after they arrive on site may negatively impact their academic progress, so it is not recommended. Please also keep in mind that requests are not guaranteed. Factors such as capacity, timetabling, and add/drop deadlines may not allow for a change to be made.

Remember that taking fewer credits in a semester than you planned with your advisor may lengthen your time to degree completion.

Withdrawing from a Course On-Site

Students are discouraged from withdrawing from courses unless absolutely necessary. Any changes that students make to their course registration after they arrive on site may negatively impact their academic progress, so it is not recommended. Withdrawing from multiple classes can affect your visa eligibility. Please be sure to check in with on-site staff to discuss this if you are thinking about withdrawing from two classes. In addition, taking fewer credits in a semester than you planned with your advisor can lengthen your time to degree completion. If you are considering withdrawing from a course, please email Dr. Sarah Kennedy, Assistant Director of Academic Guidance in Northeastern University's Global Experience Office, at s.kennedy@northeastern.edu.

Disability Accommodations

N.U.in Northern Ireland students should flag any disability needs in their QUB registration form. They must disclose any needs at this stage. If they are unable to disclose through the QUB registration form, they will need to set-up an appointment with QUB's disability services team before they arrive:
disability.office@qub.ac.uk

Northeastern Disability Resource Center

We recommend connecting with Northeastern's Disability Resource Center, both so your accommodations are on file for the spring semester and so Northeastern can provide any accommodations you may need beyond what your host institution offers.

To receive accommodations through the DRC, students must provide documentation of a disability that demonstrates a current substantial limitation. Accommodations are approved based on a review of the information that is submitted. This review process is conducted on a case-by-case basis.

The process to apply for accommodations is outlined on the DRC's [website](#). Students should complete the [Student Disclosure Form](#), any additional clinical documentation showing a history of services or other relevant information via your [DRC portal](#), and, if necessary, a disability-specific disclosure form to be completed by a clinician.

Changing Your Major

The process for changing your major depends on when you make this decision:

After you have confirmed your N.U.in location and before arriving on site, you can request a major change through the Application Status Check Portal. Your change of major may not be approved if you choose a major that is not compatible with your location.

During the add/drop period at the start of the fall semester, you should talk with your Northeastern academic advisor as soon as possible about any potential major change and necessary class adjustments.

During the fall semester, if you are confident about your decision to change your major, first talk with your Northeastern academic advisor, then request a major change during the major change window specified at orientation. Your fall classes will not be able to be changed after the add/drop period due to a major change.

During the spring semester, please consult the Registrar Office's procedure for changing your major posted [online](#).

If you decide to change your major before or during your N.U.in Fall semester, your options for classes at your chosen site that apply to your new intended major may be limited: you should discuss the major change process with your Northeastern academic advisor.

Explore Program

Students in the Explore Program can meet with their Explore advisor to discuss a change of major at any time. Please reach out to your Explore advisor as soon as you make this decision to discuss the major change process! As a reminder, once fall classes begin and the add-drop period ends, fall class selections are not able to be changed (see above).

If you declared a major but become undecided, you can switch into the Explore program for individualized guidance from an Explore academic advisor and access to a peer mentor while you explore your various interests. Please email your assigned advisor to discuss your situation and the steps you will take to move to the Explore program.

Assessments and Final Exams

Students are expected to attend all scheduled sessions and other forms of instruction as defined by the programme of study and all scheduled examinations. Specific attendance requirements, including explicit attendance thresholds, will be stated by the School.

Students must inform the relevant [School Office](#) of absence due to illness within three working days of returning to studies. Medical evidence will be required for absences longer than five working days.

If an examination, class test, assessment deadline or progress review meeting will be missed due to illness, students should inform the relevant [School Office](#) in advance and should, where appropriate, submit an application for [exceptional circumstances](#). The Head of the relevant School may require any student to be examined by the University's Occupational Health Service. Repeated self-certification may result in referral to the University's Occupational Health Service. Repeated medical absences may result in referral to the [Fitness to Continue in Study](#) procedure.

More information on QUB's academic regulations is viewable [here](#).

Transitioning to Boston / Spring Course Registration

Spring Course Registration

Your academic advisor will be in touch via your Northeastern email account this fall regarding spring registration. As you did this summer when you selected your fall classes, you will again have the opportunity to work with your home college advising office to work through the course registration process for spring. Additionally, many NU academic advising offices will be sending representatives to the N.U.in program locations this fall to meet with their students to discuss their academic plans for the spring semester. Finally, there will also be a spring orientation in January where you may have another chance to review your courses with your home college advising office and confirm your classes.

Transitioning to Boston

Northeastern's campus is transitional by nature, meaning that students are constantly coming and going for domestic or global co-ops, study abroad, or other experiential learning opportunities. The N.U.in Program fits in perfectly with this culture, and you are *not* at a disadvantage arriving in Boston in January.

Due to this constant movement on campus, there is always a Spring New Student Orientation, Winter Involvement Fair, and Welcome Week activities offered each January for all incoming students. The N.U.in Program and Student Affairs also hold welcome events for N.U.in students. Arriving on campus has been likened to a reunion, as students are excited to see each other after forming such close friendships while participating in N.U.in.

N.U.in alumni have recommended getting involved in clubs and organizations, whether related to your major or to personal interests, at the start of the spring semester to widen your circle and take advantage of the large Northeastern community in Boston. You will meet others in your major in your spring classes, and attending your College-sponsored or departmental events is another easy way to participate in your academic community!

Grades and Transcripts

How to View Grades

Your professors will explain how to keep up with your grades for assignments and exams during the semester. After the semester ends, you can view your grades in your QGIS account (Queen’s Student Information System – QGIS).

You will also be able to view your grades in your Northeastern degree audit following the completion of your N.U.in program.

Grading System

Grades of D (40) and above earn academic credit, while failing grades are not able to be applied toward your progress at Northeastern.

QUB Numerical Mark Ranges	US Letter Grade Equivalent
66+	A
63-65	A-
60-62	B+
57-59	B
53-56	B-
50-52	C+
45-49	C
43-44	C-
40-42	D
0-39	F

Credit-bearing grades: A, A- B+, B, B-, C+, C, C- D

Non-credit-bearing grades: F, W

Letter Grades versus Transfer Credit

Grades earned during the N.U.in program will no longer appear as transfer credit; now, a student's letter grades earned during their N.U.in program will appear on their Northeastern transcript. This enhancement means that students will have one transcript for their entire undergraduate Northeastern experience, and grades earned during the N.U.in program will count toward a student's cumulative GPA.

How to Request Transcript

Your N.U.in program courses and letter grades will appear on your Northeastern University transcript and will be included in your Northeastern GPA. If you need to request an official transcript from QUB directly, please email nuin@qub.ac.uk.

Your On-Site Academic Resources

Learning Development Service

The Learning Development Service at Queen's provides academic skills support to students. We do this both on-course, as part of taught degree programmes, and via individual one-to-one engagement. Academic skills that we offer guidance on include: time management, exam preparation, academic writing, referencing, academic integrity, and research. You may encounter us as part of your taught modules, where we offer Canvas-based learning resources and associated live workshops. Otherwise, you are also welcome to book a one-to-one academic skills appointments with a member of the LDS team. More info available here: [Learning Development Service | Student Centre | Queen's University Belfast \(qub.ac.uk\)](#)

Virtual Resources from Northeastern

[Northeastern Global Online Tutoring Services](#)

Northeastern has partnered with Knack- a leading peer tutoring platform to offer free peer tutoring to all Northeastern undergraduate students across its global network. All Northeastern peer tutors on the Knack platform are successful current upper-class undergraduate students, and a number of them are NUin alumni. You can request a peer tutor for your courses on [Knack](#). If you have any questions regarding Northeastern peer tutoring on Knack or this partnership, please reach out to support@joinknack.com.

[The Writing Center](#)

The Northeastern Writing Center is open to students, staff, faculty, and alumni of Northeastern and exists to help writers at any level, and from any academic discipline, in their written communication. Virtual appointments are available; the most current hours are posted on The Writing Center's [website](#).

Online appointments take place in the platform WOnline, where you can text chat with a consultant and work interactively on a piece of writing. Some (but not all) consultants are available for voice/video consultations. More information about virtual appointments is available [here](#).

Your Academic Student Success Team

Academic Advisor

You have an academic advisor assigned based on your College and goals—this is a dedicated contact person for your questions about courses, graduation requirements, experiential learning opportunities, and other topics related to your academic experience and professional aspirations. Some academic advisors will be traveling to N.U.in program locations to meet with students in person, but advising is available to you through your home college virtually during the entire fall semester!

Please use the email addresses below to contact your College’s advisement team for questions about courses, majors, and other academic topics. For more information about each College, please use the links on the left:

Bouvé College of Health Sciences	Bouvé Advising: bouvestudentservices@northeastern.edu
College of Arts, Media and Design	CAMD Advising: camdadvising@northeastern.edu
Khoury College of Computer Sciences	Khoury Advising: khoury-advising@northeastern.edu
College of Engineering	COE Advising: COEAdvising@northeastern.edu
College of Science	COS Advising: COSAdvising@northeastern.edu
College of Social Sciences and Humanities	CSSH Advising: csshadvising@northeastern.edu
D’Amore-McKim School of Business	DMSB Advising: ugbs@northeastern.edu
Explore Program for undeclared students	Explore Advising: explore@northeastern.edu

Student Success Guide (SSG)

The Student Support Initiative matches every incoming Husky with a trained upper-year peer mentor called Student Success Guides (or SSGs for short) and peer cohorts (SSI Packs) via the MentorHub NU app. Your SSG serves as a navigation guide for you to quickly and efficiently connect with the experts and resources you need. If you aren’t sure which Northeastern office would be best for you to connect with to help with whatever you may be dealing with, your SSG is an experienced student to whom you can reach out for some direction.

As an N.U.in student, you have the same access as all first-year Northeastern students to your SSG through the MentorHub NU app! The only difference is that you will have a professional staff member and Site Coordinator who can be reached via the Mentorhub NU app. While the SSG will be based in Boston, you will have in-person support at your location through the program’s professional staff.

Communicating with Professors

The best way to get in touch with your professors outside the classroom is the method they designate in their syllabus, the course outline you receive on the first day of class. If you have a question related to an assignment, your grade, or the course content, your instructor will include their contact information in this document and specify whether they would prefer you email, call, or stop by their office hours. If you are unsure of how to contact your professor, sending your message from your student email account to their institutional email account is a good method.

Before reaching out to your professor with a question, please double check your syllabus to make sure it isn't answered there! The syllabus contains important information about attendance and grading policies, major assignments and deadlines, and the structure of the course. If you receive an email back from a professor asking you to refer to the syllabus, don't be discouraged—this is an email almost everyone gets at some point in their first semester of college! The syllabus is an excellent resource that most U.S. high school teachers do not use or do not use the same way, so make sure you take time to become familiar with the syllabus you receive from each class during your first week to avoid asking your professors anything answered in this document.

We encourage you to utilize your professors' office hours for discussion about your grade and performance in the course! You are discouraged from appealing grades for any reason other than administrative error. Your professor can help you understand your grades and recommend resources.

If you feel your professor's teaching style is a mismatch for you, utilizing tutoring services is a good way to bridge the gap by reviewing the material with another person in a different way. Forming study groups with classmates is another good strategy to adapt to this situation. For example, if your professor spends the class time lecturing when you prefer to learn through group discussion, you can adapt by focusing on taking the best notes you can during lectures, then reinforcing what you learned by having a designated time to debrief with your study group. Expressing to your professor that you are struggling with the class format can help you work together to find support so you can succeed in the course, but keep in mind that cultural differences mean your professors' teaching styles are unlikely to perfectly resemble the learning experiences you may have had at a U.S. high school.

Long-Term Academic/Co-op Planning

Like all Northeastern students, N.U.in students create their own unique academic path, including co-op experiences, with most graduating in either four or five years. When you start your college career with N.U.in, you will still have all the same options as students beginning in Boston in the fall and will be able to tailor your journey to graduation. If you are particularly interested in a four-year model, you may want to explore the option of NUterm, a summer semester of classes for rising sophomores at Northeastern.

Students typically have flexible schedules. You should work closely with your academic advisor to determine the best progression track based upon your interests and graduation goals. We urge you to think carefully about where your primary academic interests lie before selecting an N.U.in location. This will ensure that you begin with a strong base of prerequisites before progressing at Northeastern in the spring.

Getting Ready for Co-Ops

The [Employer Engagement & Career Design](#) office provides personalized career guidance for undergraduate, graduate students, and alumni, and also has great resources for resumes, cover letters, LinkedIn profiles and more. This is an excellent resource you can connect with virtually during your N.U.in semester or in person when you arrive in Boston in the spring! It is never too early to start considering career and co-op options, and familiarizing yourself with the resources and connections available to you for free as a Northeastern student will prepare you for your co-op search.

What can I do this summer to prepare for the N.U.in program?

Preparatory Summer Courses – College of Science

Northeastern's College of Science offers important preparatory online summer courses to get you prepared for first-year biology, chemistry, physics, and calculus courses.

We highly recommend that you complete these courses before departing. These online non-credit modules cover high school content that will get you ready to succeed in introductory science classes. They may cover important foundational content that you did not receive in high school or review concepts that you will be expected to know coming in to introductory science classes.

If you are enrolled in biology, chemistry, physics, and/or calculus courses this fall, please check your NU Canvas for the relevant Ramp-Up preparatory courses this July and August!

Make a Time Management Plan

Decide now on a time management strategy you will use to keep track of deadlines this fall. Think about how you organized your time in high school: did you use a planner, a time management app, or rely on your teachers to remind you about assignments and important dates? If you have a method that works for you already, make sure you bring any supplies you need (purchase a new planner, double check that the app you are used to will work on the phone you plan to use abroad and at your host location). If you have not used a planner or time management app before—or haven't used either successfully or long-term—we recommend exploring some options on your own this summer and using one to keep track of personal goals and your preparation for the fall for at least two weeks. Hopefully, this experimentation will show you whether a virtual or written planner works best for you!

Here are some of the best tips for time management we have collected from students' experiences and research on academic success.

- **Find a calendar system that works.** Some prefer using their cell phone. Others use built-in computer software and even the old standbys, paper planners or calendars. The method is less important than making sure whatever you choose works for you so you will consistently use your system. Choose a calendar or project management system that is reliable and easy to update. Then, populate it with every detail and deadline you need to keep yourself on track. Start by adding your course deadlines from your syllabi, then fill it out with any family, social, or other obligations.
- **Keep your class syllabi close.** Your syllabus for each class contains important information about attendance and grading policies, major assignments and deadlines, and the structure of the course. Your syllabi are your guides to success in each of your courses: keep them close!
- **Eliminate social distractions.** When studying or writing, consider turning your phone to silent or Do Not Disturb, or, better yet, put it out of reach so that you don't check for missed calls and texts. Even that brief look at a friend's text message or scroll through social media interrupts your thought processes and slows you down.
- **Schedule study time.** Treat your study time like a job: schedule it in your calendar and show up to do it, just as you would for a job or important appointment.

- **Use to-do lists.** Make a habit of writing down at the end of your workday (whether on paper in your planner or a note on your phone) a list of tasks you plan to accomplish the next day. List them in order of importance. Consult that list first each morning to help yourself stay focused on your daily goals.

Expect Common Challenges

Read and think through the following scenarios, reflective questions, and strategies for taking on some common academic challenges we have seen past N.U.in students tackle. Northeastern students are generally those for whom academics have long been a focus and area of success. The transition from high school to college might not seem daunting because you know you can handle the academic work, but there are differences in the ways classes are structured and your work is evaluated in college. The below scenarios will help you think about how you might respond to these challenges and give you an idea of what to expect.

1. You receive a syllabus for one of your classes that shows your grade is calculated only from a research paper worth 75% of your grade and a midterm exam in October worth 25% of your grade.

- Is this intimidating, because this makes both the exam and paper high-stakes assignments, or a relief, because there is less daily or weekly work?
- How will you break up writing the paper and studying for the exam into smaller, weekly tasks to avoid last-minute studying and writing crunches?

The best first steps you can take to plan for long-term assignments are to carefully read your syllabus when you receive it and enter all deadlines into your time management app or planner.

For a research paper, you can create smaller goals and deadlines for yourself to make sure you are staying on track. For example, if you have a paper due at the beginning of December, you can set a deadline for yourself to decide on your topic by October 1, find and read your initial sources by October 31, outline your paper the following week, and complete your paper by November 30 so you have enough time to take your work to your professor’s office hours to review or to a virtual NU Writing Center appointment.

If your grade is heavily dependent on exams, you will want to be sure you are taking good notes in class so you have a foundation to study from later. You can speak with your on-site staff or your Student Success Guide about study skill advice and good notetaking practices. One notetaking tip is to use one method, like handwriting notes in sentence or phrase form during lectures, and then to use a different method, like typing up those notes and organizing them into an outline or chart form, soon after to review. This helps solidify the knowledge in your mind and, again, gives you great materials to study from when the midterm and final exams are approaching. As with a long-term paper, you should set aside specific blocks of time in your app or planner to study for an exam. Leave enough time to email any questions to your professor and receive their response before the exam, utilize tutoring services, or work with classmates as a study group.

It can be difficult to keep long-term assignments and end-of-term exams at the front of your mind with so much else going on, which is why it’s so important to plan ahead for these deadlines at the beginning of the semester! Your syllabi are your guides to success in each of your courses.

2. You want to drop a class.

- What is it about the class that made you change your mind? Since you and your advisor decided on these classes as the best path forward for your academic plan, we discourage changing your schedule after arriving on site in most circumstances.
- Consider the consequences of dropping versus staying in the course.
 - Is the class necessary for your major or other plans, meaning you will need to take it in a future semester if you drop it now?
 - Is the class a pre-requisite, meaning you can't move forward onto the next course in a series without completing this one first?
 - If you stay in the course, do you think you could earn the D- minimum grade you need?
 - Are there alternative classes available that would contribute toward your degree progress?

Try organizing your thoughts in a pro and con list to see if dropping the class makes sense for your situation. Again, it is usually best to stick with the schedule you determined over the summer with your academic advisor! Sharing your pro and con list with your academic advisor will help you both make the best decision for your academic plans.

3. You didn't really need to study in high school as long as you paid attention in class. This semester, you're attending every class and paying attention, but you still struggled with your midterms.

- How are you feeling about how your midterms and semester overall have gone so far? It can be shocking and disheartening to get lower grades than usual or to have more difficulty than you expected with your coursework. This is a reflection of the difference between college-level and high school-level work, not an indication your abilities have changed!
- What can you do differently to prepare for your finals?

If you are confused about a grade or want to review content, you should stop by your professor's office hours (time and location will be listed in your course syllabus). If you understand what happened with the exam and feel you could have done better had you prepared more, your academic advisor and virtual peer tutors from Northeastern can help with time management and study skills.

Success in college-level work does tend to require more active participation and time outside the classroom than success in high school. You were accepted to Northeastern because you have proven you're up for the challenge! The transition from high school to college is difficult for most first-year college students, even high-achieving students. Regardless of how many college credits you may have accumulated in high school, this transition involves much more than your classes. Your Student Success Guide on the Boston campus is a great resource for support with this: they have been through the same themselves, and they are likely also helping Boston-based students with the same challenges you are facing now!

Beyond the usual adjustments of starting college, you are in a uniquely new situation with so many changes to your day-to-day life in these summer and fall months, making this transition even more layered and complicated! Congratulate yourself on how many areas you *are* succeeding in, then ask what the main struggles you have been having are. Your academic difficulties may be due more to

homesickness or something else besides the course material itself. Connecting with mental health resources, your site staff, and your academic advisor about these challenges can help you work out strategies that address your individual needs to better position you for the rest of the semester.

4. You receive a grade you disagree with on an assignment.

- Which emotions are you dealing with? You might be angry with your professor, disappointed in yourself, checked out from the course, or motivated to ask for additional support. It's important to take stock of your feelings and give yourself time to cool down before taking action.
- Reread the assignment if you have access to it. Again, wait until your initial reaction to the grade passes to do this. Can you follow your professor's thinking based on their feedback and any marks and comments on the assignment?

If the grade makes some sense to you but you have questions, or you want to discuss your performance in the course and how to move forward more generally, this is a good time to utilize your professor's office hours. Approach your professor with the intent to understand your grade and make a plan to finish the course successfully. Please note that you should not challenge grades based on your professor's academic judgment, but you and your professor can work together to correct any administrative error with your grade. (These are thankfully rare!)

When you discuss your grade with your professor, differences in academic standards between institutions and cultures may become evident. It is important that you listen to your professor's perspective and respect their expertise in the subject you are learning. You can talk more about cultural differences between U.S. classes and expectations at your host institution with site staff. Based on what you learned from your professor, you will also have a good idea of the kinds of clarifying questions you should ask professors when you receive assignment rubrics! This is a skill that will help you in your coursework in Boston, too.

Maximizing Global and Intercultural Learning

Advancing your global and intercultural adaptation skills is one of the key goals of N.U.in. Simply experiencing other cultures is not enough to advance these skills; rather, active knowledge of self and others is necessary to learning cross-cultural adaptation. You can practice these steps to advance your knowledge:

- Review the foundational material in the Pre-Departure online course you received in May/June
- Think about/write about the following self –assessment questions in a journal or notebook:

Global and Intercultural Self-Assessment

Think about 2 or 3 ways that you identify. Some dimensions to keep in mind are gender, religion, socioeconomic class, education level, sexual orientation, race and ethnicity. It is important to note that the way that you identify may be different from the way that you are perceived — but for the purpose of this activity we want you to define yourself.

Now, reflect on a moment in your life that made your identity very salient to you :

Did something happen that marked when you started thinking about it? (examples include a disruption in a parental relationship, moving to a new place for university, changing a style of dress, a new friendship or relationship)

When did you become conscious that this was an important piece of who you are?

Was there an event or experience that later solidified this identity? What was it about this event or experience that cemented this identity as an important part of who you are?

Intercultural Praxis Model

Familiarize yourself with the Intercultural Praxis Model, developed by Dr. Kathryn Sorrells. This model proposes a non-linear, dynamic, interactive process of intercultural communication featuring the following components:

- **Inquiry:** In the Inquiry phase, you express curiosity and openness to dialogue with other cultures and ways of knowing and understanding. You practice active listening and turn off your judgement or critical lens to truly understand another's perspective and "walk in their shoes"
- **Framing:** In the Framing phase, you understand that your and others' perspectives are limited by frames of knowing and understanding. You seek to understand and appreciate these frames (such as a person's socioeconomic background, worldview, gender, sexual orientation, etc.) as valid for that person and the culture or society they belong to.
- **Positioning:** In the Positioning phase, you reflect upon the nature of power, who is silenced and why (including yourself), and how societies position people and classes to enact certain roles (such as vocations or menial tasks). You consider how you might act to help partner and collaborate for change.
- **Dialogue:** In the Dialogue phase, you engage in conversation, listening, and dialogue with those who are different than you, in order to further understanding and mutual empathy.
- **Reflection:** In the Reflection phase, you take time to step back and process your thinking and interactions around difference. You also assess your capacity to be an agent of change, and reflect upon any experiential learning you may have encountered.
- **Action:** In the Action phase, you consider how you can be an agent of change and what is ethical and responsible versus what might be considered "saviorism". How can you partner with another person or organization of people/community to enact incremental and meaningful change?

Global Learning Experience Course (1 credit)

To dive deeper into these topics, consider registering for the 1-credit, online Global Learning Experience course. The Global Learning Experience is offered at select N.U.in locations.

Global and Intercultural Communication Module/Digital Badge (non-credit)

If you are not enrolled in the Global Learning Experience course, consider enrolling in our **Global and Intercultural Communication Module/Digital Badge**. This module is fully asynchronous (self-paced) and can be completed over the fall semester online. Learners who complete the module will earn a Digital Badge in Global and Intercultural Communication (Level 2: Intermediate) through Credly, which can be imported into LinkedIn profiles and digital resumes. If you are interested in joining the fall cohort, please contact Bryan McAllister-Grande at b.mcallister-grande@northeastern.edu.
